

The **symbolic degrees of the Zodiac** are unrecognised and unexplained. Every degree of the Zodiac indeed contains an Oracle which allows to specify the study of the astrological theme. All these Oracles form the Barbarian Sphere, which goes back to antique Egypt, but the secret of which got lost.

This secret was finally rediscovered by the author. The Barbarian Sphere reveals surprising architecture. Behind every degree of the Zodiac hides an astrological mini-chart, the interpretation of which leads to the Oracle, its image and its meaning.

Beyond this revelation, the book presents a restored set list of symbolic images (decans, fifths and degrees) that are the Golden sphere, the Thebaic Calendar and the Volasfera. It renews also completely the question of the fixed Stars influence.

The author also published several other innovative books of astrology which can be found at the same publisher.
